TECHNICAL SKILLS

Programming	Python, C++, Java
Backend & Web	Spring Boot, Spring MVC, REST APIs, FastAPI, Flask, React.js, JWT
Data & Analytics	SQL, Pandas, NumPy, Data Cleaning, EDA, Feature Engineering, MySQL, SQL Server, Power BI, Excel
Machine Learning & AI	Scikit-learn, SVM, Random Forest, TensorFlow, PyTorch, OpenCV, YOLO11, DeepFace, FaceNet512, Generative AI
Development & Testing	Git, GitHub, JUnit 5, Swagger, Postman, IntelliJ IDEA, VS Code
Coursework	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks, Cloud Computing, Software Engineering

INTERNSHIPS

MPOnline Limited	May 2026 – July 2026
<i>Software Development & AI/ML Trainee</i>	<i>Bhopal, MP</i>
- Produced a web-based Library Management System using ASP.NET Core MVC, C#, Entity Framework Core and SQL Server, implementing the MVC architecture, role-based access and responsive Bootstrap 5 UI. [Certificate] - Constructed 5+ machine learning workflows involving data preprocessing, feature engineering, model training and evaluation using Scikit-learn, Pandas and NumPy. [Certificate]	

PROJECTS

SmartRetailAI GitHub	<i>Python, FastAPI, YOLO11, DeepFace, FaceNet512, Scikit-learn, SQLAlchemy</i>
- Engineered an AI-powered retail platform with 8 integrated modules using FastAPI, SQLAlchemy, and REST APIs for customer management, enrollment, visits, reviews, face recognition, product detection, sentiment analysis, and chatbot services. - Established an incremental face recognition pipeline using DeepFace and FaceNet512 to generate 512-dimensional embeddings, enabling customer enrollment, SVM retraining, runtime model reloading, and automated customer visit identification. - Integrated multimodal AI capabilities using YOLO11 for product detection, TF-IDF with 10,000 features and Logistic Regression for sentiment analysis, and Gemini 2.5 Flash for a context-aware retail chatbot with conversation memory.	
Hospital Management System GitHub <i>Java, Spring Boot, Spring Security, JWT, React, MySQL</i>	
- Developed a functional Hospital Management System using Java, Spring Boot 3.5, React, and MySQL, implementing patient, doctor, appointment, and user management through REST APIs. - Secured authentication and authorization using Spring Security, JWT, BCrypt, and role-based access control across 4 user roles: Admin, Doctor, Receptionist, and Patient. - Built modular backend services with Spring Data JPA, Hibernate, Bean Validation, and centralized exception handling, supporting complete CRUD workflows for doctors, patients, and appointments.	
AI Powered Sentiment Analyzer GitHub <i>Java, Spring Boot, HuggingFace API, MySQL, JUnit 5</i>	
- Delivered Positive/Negative/Neutral classification with confidence scoring and MySQL persistence, alongside REST APIs for search, filtering, pagination, sorting, history, and sentiment analytics. - Designed an extensible AIClient abstraction with Hugging Face, LocalAI, and Mock AI providers, decoupling sentiment inference from business logic and enabling seamless AI provider replacement. - Automated a scalable CSV batch-processing pipeline using Apache Commons CSV to analyze, validate, persist, and retry failed sentiment predictions, successfully processing 500+ reviews with 0 failures.	

EDUCATION

VIT Bhopal University	Shore, MP
<i>Bachelor of Technology – Computer Science & Engineering (AI & ML)</i>	<i>Sep 2023 – May 2027</i>
CGPA: 8.86/10.0	
Dr. Jagannath Mishra College	Muzaffarpur, Bihar
<i>Intermediate (Class XII)</i>	<i>Apr 2021 – Mar 2022</i>
Percentage: 78.2%	
Disha Delphi Public School	Kota, Rajasthan
<i>Matriculation (Class X)</i>	<i>Apr 2019 – Mar 2020</i>
Percentage: 83.6%	

CERTIFICATIONS

Machine Learning with Python – University of Michigan	Dec 2025
Skills: Scikit-Learn, Regression, Classification, Clustering, Model Evaluation
